THE

ELECTRICAL WORLD

AND

ENGINEER

A WEEKLY REVIEW OF CURRENT PROGRESS IN ELECTRICITY AND ITS PRACTICAL APPLICATIONS

VOLUME XXXVIII

LIBRARY OF THE UNIVERSITY OF CALIFORNIA

FROM JULY 6 TO DECEMBER 28, 1901

NEW YORK

ELECTRICAL WORLD AND ENGINEER

TK1
E5
v.38

INDEX TO VOLUME XXXVIII

GENERAL ALPHABETICAL INDEX

NOTE.—*Entries from the Digest of Current Electrical Literature are indicated by D. (Digest) and D. R. (Digest Reference.) Illustrated Articles are indicated by*.*

A

Aaron Electric Co. Multipolar dynamo and motor, 752*.
Abbott, Arthur Vaughan. Biographical sketch and portrait, 1052.
Acetylene as anodic depolarizer. By Coehn, (D.) 147.
——black. Manufacture of. Frank patent, 473.
Accounting. Modern electric light, 726.
Acme Switch Co. Automatic time switch, 308.
Aeronautics and electricity. By Hospitalier, (D.) 475.
Air Insulation. Resistance of, 126.
——Natural and radioactive. By Elster and Geitel, (D.) 228.
Air-gap induction, 879. By F. W. Carter, 884*.
Albumens. Electrolytic production of substitutes. Blum patent, 106.
Alkali. Girouard cell for production of caustic, 344.
——Industry. By Seibert, (D.) 999.
——Salt vapors. Electrolysis of. By Wilson, (D.) 690.
Alkalis and chlorine, (D. R.) 861.
——Acker process for the production of. By J. B. C. Kershaw, (D. R.) 826, (D. R.) 790.
——Diaphragm cells for production of. By J. B. C. Kershaw, (D.) 949.
——Electrolytic production of. By Cohn and Geisenberger, (D.) 602.
Alkylammonium-amalgam. By Crotogino, (D. R.) 30.
Alloys. Aluminum-zinc. By J. W. Richards, (D.) 1035
——Commercial aluminum-zinc. By J. W. Richards, (D.) 73.
——Electro-deposition of. By Lehfeldt, (D.) 147.
——made in the electric furnace. By Sargent, (D.) 147. Hamilton and Smith, (D.) 147.
——Some dangers of, 580.
Awards. Pan-American, 627, 649, 667.
ALTERNATORS. (See also Dynamo, Generator).
——Compound. By Woodfield, (D. R.) 512.
——Compounding. Steinmetz patent, 106.
——Construction of. By Lasche, (D. R.) 386, 435, 474.
——Conversion of single-phase to polyphase. By E. K. Scott, (D.) 557.
——dampers, 1050. By J. Fischer-Hinnen, 1058*.
——Design of large. By A. Heyland, (D.) 347.
——Diagrams of the action of an. By Barbillion, (D. R). 226.
——Ferranti iron-type, 36*.
——High-frequency. By Chadwick, (D. R.) 108.
——Induction and copper in armatures of. By Wilson and Marden, (D.) 386.
——Inductor. By E. Heitmann, 548, 594, 636*.
——Inductor, litigation, 555.
——Inductor. Periodic variation in the exciting current of. By Duddell and Marchant, (D.) 1032*.
——Natural period of oscillation of. By Soubrier, (D. R.) 947.
——Oerlikon, (D. R.) 70.
——in parallel. Operation of, (D.) 734. By Darrow, 1074.
——in parallel run by tandem-compound engines. By Garfield, (D.) 860.
——in parallel. Synchronous motors and. By Russell, (D.) 226.
——Regulating. Edwards patent, 300.
——Regulation of. By A. S. McAllister, (D. R.) 226.
——Self-exciting. By Bunet, (D.) 859.
——Self-exciting asychronous induction, 492.
——Short-circuit current of three-phase machines. By Bauch. (D. R.) 687.
——testing. By Goldschmidt, (D.) 435*.
——Theory of. By Woodfield, (D. R.) 512.
——Theory of the short-circuited. By Horschitz, (D. R.) 137*, (D. R.) 600.
——22,000-ampere, (D.) 474.
——Variations in speed of parallel-driven, 711.
ALTERNATING CURRENTS:
——And direct-current systems, (D.) 72.
——Circuits. Regulation of. Everest patent, 898.
ALTERNATING CURRENTS.
——Constant current from constant e. m. f. 3, 21*.
——Conversion into direct-current by electric valves. By Montpellier, (D.) 263.
——Conversion into direct-current from electro-chemical standpoint, (D.) 266.
——Measurements. By Treichlinger, (D.) 111.
——Measuring instruments. By Addenbrooke, (D. R.) 737.
——motor without brushes. Self-starting single phase, (D. R.) 386.
——plants. Efficiency of. By Weyde, (D.) 689.
——Rectifying by aluminum valves. By E. H., (D.) 226.
——Rectifying by Hall effect. By des Courdes, (D.) 220*.
——Single-phase system advocated. By Warrilow, (D.) 436.
——Terminology, (D.) 737, 825. By Boucherot, (D.) 902, (D.) 999. By W. H. Browne, Jr. Dr. Louis Bell, 1031.
——Theory of three-phase. By Russell (D.) 437.
——Top factor. By La Cour, (D.) 303. Benischke, (D.) 303.
——Wave-forms. Plotting. By Blondel, (D. R.) 230. By Hospitalier, (D.) 350*, (D.) 691.
Aluminum. By Wilson, 394, (D.) 689.
——vs. Copper, 757, (D.) 862.
——Galvanic coppering of. By Gianoli, (D.) 190.
——Improvement in metallurgy of. By C. P. Townsend, 14.
——manufacturers. Association of, 798.
——Production of. By Ohly, (D. R.) 190.
——rectifiers. By Pollak, (D.) 110. By Mitkiewiz, (D.) 887.
——valves. Rectifying alternating currents by means of. By E. H., (D.) 226.
——zinc alloys. Commercial. By J. W. Richards, (D.) 73, 189, 1035.
American Association for the Advancement of Science, 245, 260.
American District Steam Co. Pan-American exhibit, 308.
American Bell Telephone holdings, 66.
American Electro-Chemical Society, 768, 995, 1071.
American Engine Company. Pan-American Company, 353.
American Incandescent Lamp Co. Formation of, 353.
American Institute of Electrical Engineers, 164, 183, 209, 248, 284, 319, 336, 723, 918.
American Miniature and Decorative Lamp Co. Electric signs, 441
American Society of Mechanical Engineers. Annual New York meeting, 937.
American Steel & Wire Co. Exhibit at Pan-American.
American Street Railway Association. Annual meeting, 256, 615*, 628, 645.
Ammeters. Atkinson, (D.) 73.
——Column type, (D. R.) 389.
——Hot-wire. By Soulier, (D.) 902*.
Amines. Electrolytic production of. By Chilesotti, (D. R.) 229.
Ammonium. Iron cathode in a solution of nitrate of. By Kaufmann, (D.) 229.
Arc. Direct-current. By Peukert, (D.) 29*. Janet, (D.) 687.
——Mechanism of electric. By Hertha Ayrton, (D.) 386.
——Photographs of. By Scott, (D. R.) 947.
——Pyrogenetic reactions by means of the. By Loeb, (D.) 190.
——Resistance and e. m. f. of, 581. By Duddell, (D.) 654.
——Speaking. By Ruhmer, (D. R.) 476. Janet, (D. R.) 690.
ARC LAMPS:
——By Chester, (D. R.) 512. By Bainville. (D. R.) 651. By Bochet, (D.) 687.
——Bardon. By Montpellier, (D. R.) 387.
——Bremer, 246, 259. By Laporte, (D.) 387, 651. By Schaft, 512, 685.
——Higham patent, 434.
——Illumination from, 432.
——Lane enclosed, 115*.
——Polyphase. Rice patent, 27.
——Rasch. By Rasch, (D.) 557.
ARC LAMPS.
——Regina, (D. R.) 28.
——Compensating winding. Elihu Thomson patent, 185.
——Light flux of, 162.
——Low frequency single-phase. Fish patent, 511.
——Lupus cure, 433.
——Open versus enclosed, 385.
——Patents. Thomson, Steinmetz, Higham, Symons, Way, Luhr, 100.
——Regulation. Alternating-current series Baker patent, 649.
——With three arcs, (D. R.) 600.
——Dynamo troubles. Some brush. By Hanlon, (D. R.) 1074.
——Photometry. Mathews apparatus, 528, 549*.
Arc lighting. Helios-Upton system, 999*.
——Rice patent, 68.
——Thomson constant-current transformer for alternating series, (D. R.) 948.
Armatures. Slotted. By E. Dick, (D.) 386. By Rothert, (D. R.) 435. Berry, (D. R.) 512. Ziehl, (D.) 1557. Meyer, (D.) 1557.
——Re-winding of a 5,000 H.-P. By A. B. Weeks, 719*.
——winding. Alternator. Lamme patent, 345.
——With commutators for alternating-currents. By Leblanc, (D.) 859.
Arnold, B. J. Biographical sketch, with portrait, 52.
Ash-handling. Telpherage. Elizabethport, N. J., 564*.
——Belt conveyors as, 568*.
Associations. (See titles, National Electric Light, etc.).
Association of Edison Illuminating Companies. Annual meeting, 366, 470.
Atmosphere. Ions in the. By Ebert, (D.) 789.
Atmospheric discharges. Electrograph for, (D.) 862.
Atoms and electrons. By Sutherland, (D.) 602.
——Masses smaller than. By Edser, (D. R.) 110. J. J. Thomson, (D.) 227.
——Reality of. By Ruecker, (D.) 602, 736.
Aultman Company. Coal handling plant, 907*
Aurora Borealis. "Mother of pearl" clouds, 431.
AUTOMOBILE:
——By Mueller, (D. R.) 601, 788. Pelot, 788.
——Contal, (D.) 436.
——Eight horse-power gasoline, 306*.
——Fire chief's, 114*.
——Krieger, (D.) 997.
——Omnibus, (D.) 188.
——Stages. New York city, 983*.
——Thompson, 398*.
——"Tonneau," 35.
——Contact device for feeding from overhead wires. By Reyval, (D. R.) 900.
——Drop forgings for, 400*.
——Long runs on one charge. By Joel, (D.) 997.
——Manufacturers. Meeting of, 830.
——Motors. By Gasnier, (D. R.) 435, 900.
——Race. Paris-Berlin, 10.
——Records on Coney Island Boulevard, 701, 841, 851*.
——Savings bank, 434.
——Show in Budapest, 345. New York, 511, 791*. Paris, 1031.
——Storage batteries, 527, 538*.
——Testing. By Rankin Kennedy, (D. R.) 264.
——Tests. Cleveland and Chicago, 308*. By F. C. Phillips, 391*.
——Tests. New York-Buffalo, 180, 385, 432, 650.
——Club of America, 141, 1068.
Automobilism in France, 1030.
——Sandwich Islands, 551*.
——Some Dangers of, 580.
——Pan-American awards, 627, 549, 667.

B

Balance. Electric. By Cremieu. (D.) 30*
Barstow, W. S. Biographical sketch, with portrait, 456.
Battery. (See Primary, Storage, etc.)
Baylis, R. N. Biographical sketch, with portrait, 712.
Bay State Traction Co. Maxham contract system, 862.

94135

Bauxite. Electrolytic purification of. Roberts patent, 510.
Becquerel rays, burning by, 414.
——Velocity of. By Kaufmann, (D. R.) 388.
Becker-Brainard Milling Machine Co. Motor-driven miller, 750*.
Behrend, B. A. Biogrpahical sketch, with portrait, 4*.
Benjamin Elec. Mfg. Co. Cluster fixtures, 193.
Benzidine, electrolytic manufacture of, (D. R.) 515.
Berlin Exposition. By Ruhmer, (D. R.) 478. Wilking, (D.) 604.
Berg, E. J. Biographical sketch, with portrait, 284.
Bernard Co., E. G. Back-geared motor, 752*.
——Pan American exhibit, 402.
Besly & Co., Chas. H. Band polishing wheel, 605*, 751*.
Billings & Spencer Co. Drop forgings for automobiles, 400.
Birmingham, Ala., railway and lighting consolidation, 152.
Bismuth. By Lownds, (D. R.) 901.
——Hall effect and resistance of. By Van Everdingen, (D.) 228.
——Resistance of, to alternating currents. By Simpson, (D.) 476.
Bit stock. Angle-boring, 867*.
Black body, electrical. By Summer and Kurlbaum, (D.) 305.
Blast furnaces, electric burner for. By Grammer, (D.) 862.
Bleaching by electricity. By Walsh, (D. R.) 30. Tailfer, (D. R.) 515. Briggs patent, 647.
Blood. Magnetic properties of human. By Gasngee, (D.) 561.
Boat. Electric submarine, 283.
——Submerged propeller electric, (D. R.) 825.

Book Reviews:
—Annuaire pour l'an 1901, 192.
—Atoms and energies. By D. A. Murray, 112.
—Automobiles electriques. By Sencier and Delasalle, 739.
—Cours d'electricite. By H. Pellat, 951.
—Dental electricity. By L. E. Custer, 693.
—Directory electrical trades, 352.
—Dynamos and motors. Shop and road testing of dynamos and motors. By E. C. Parham and J. C. Shedd, 390.
—Electrical catechism. By Prof. G. D. Shepardson, 1036.
—Electrical engineering formulæ. Pocketbook of. By Geipel and Kilgour.
—Electromagnet. The. By T. Wolcott, A. E. Kennelly and R. Varley, 516.
—Electromagnets: Their design and construction. By A. N. Mansfield, 739.
—Electro-magnetic phenomena. Treatise on. By T. A. Lyons, 191.
—Electromotoren fur mechselstrom und drehstrom. By G. Roessler, 827.
—Elektrische Verbrauchsmesser der Neuzeit. By Zacharias, 32.
—Elementary questions in electricity and magnetism. By M. Maclean and E. W. Marchent, 112.
—Engineering education, 604.
—Engineering and electric traction pocketbook. By P. Dawson, 739.
—Etudes sur les paratonnerres. By A. Della Riccia, 951.
—Experimental physics. By E. Sommel, 192.
—Handbuch der Electrotechnik. By Nethammer and Schultz, 351.
—How to become a good mechanic. By J. Phin, 739.
—Indicator handbook. The, 1036.
—Induction coils; how to make, use and repair them. By H. S. Norrie, 230.
—Instructions for the use of telephones, 192.
—Inventor's manual, 148.
—Lessons in practical electricity. By C. W. Swooper, 1078.
—Handbook for machinists' apprentices. By O. J. Beale, 351.
—Manufacturers of the United States. Tugman's index to the, 478.
—High temperature measurements. By Le Chatelier and Boudouard, 604.
—Mechanical drawing. By F. W. Bartlett, 561.
—Recording and integrating meters. By R. Ferris, 738.
—Mill building construction. By H. G. Tyrrell, 903.
—Motor. The induction. By B. A. Behrend, 903.
—Moteurs synchrones a courant alternalifs. By A. Blondel, 516.
—Motor vehicle. Construction of a gasoline. By C. C. Bramwell, 738.
—Nature's miracles. By Elisha Gray, 305.
—Ohio Electric Light Convention, 74.
—Original papers by the late John Hopkinson. By B. Hopkinson, 561.
—Physical chemistry. Introduction to. By J. Walker, 692.
—Practical electro-chemistry. By Blount, 191.
—Practical electrical testing. By G. D. A. Parr, 305.
—Railway handbook. Practical electric. By A. B. Herrick, 561.
—Schaltungsarten und Betriebsvorsehriften. By A. Kistner, 1078.
—Telephone lines and their properties. By W. J. Hopkins, 192.
—Telephone system of the British Post Office. By T. E. Herbert, 827.
—Theoretical elements of electrical engineering, 439.
—Transactions of the American Institute of Electrical Engineers, 951.
—X-Ray work. Practical. By F. T. Addyman, 951.
Boilers. Zinc in. By Douglass, (D. R.) 1075.
Booster systems. Storage battery. By Lamar Lyndon, 13*, 65*, 49.
Borides. Metallic. By Tucker and Moody, (D.) 73.
Bowsher Company, N. P. Ready-dressed mill cogs, 113.
Brake and car heater. Westinghouse electric railway, (D.) 144.
——Dynamometric. By Guillaume, (D. R.) 948.
——Eddy current. By Feussner, (D.) 438.
——Electric railway. Emergency, (D. R.) 948.
British Institution of Electrical Engineers. Visit to Germany, (D. R.) 112. By E. K. Scott, (D.) 560.
Brooklyn Rapid Transit, 39.
Brown, C. E. L. Debt of electrical engineering to. By B. A. Behrend, 805, 809, 845, 881, 932, 1015*.
Brushes carbon. Fish patent, 68.
Buffalo Forge Co. Pan-American exhibit, 269*.
Buffalo terminal transformer station. By Woodbury, (D.) 227.
Buck, Harold W. Biographical sketch and portrait, 674.
Bullock Elec. Mfg. Co. Motors, 746*.
——Pan-American exhibit, 234.
——Railway generators, 905.

C

C. & C. Electric Co. Electrical equipment of white goods factory, 741*.
Cables. High-tension. By Schaefer, (D.) 997.
——Networks. Potential of insulated. By Guyer, (D. R.) 736.
——Telephone. By Baechtold, (D.) 190*.
——Underground, (D. R.) 437.
Cables, Submarine:
——Alaska, 184, 261, 384, 385.
——Atlantic. New, 1030.
——Australian, 15,000-mile, 811.
——Azores, 858.
——Canadian, 298.
——Chinese. New, 183.
——Cuban controversy, 65.
——Greece, 570.
——Indo-China. French, 106.
——Pacific. Proposed, 104, 598, 841, 858, 945, 994.
——Pacific. American proposed, 384, 509, 556, 627, 648, 946.
——Pacific. British, 224, 432, 685.
——Philippines, 732. By Moore, (D. R.) 1035.
Cables. By Larose, (D. R.) 737.
——Artificial submarine. By Trowbridge, (D.) 190.
——Currents and potentials on submarine. By Crehore, (D. R.) 191.
——Factory. Measurements in a. By Krejsa, (D. R.) 31.
——Gutta percha supply, 592.
——Localization of breaks. By Rymer-Jones, (D. R.) 31. Jona, (D. R.) 73. Rymer-Jones, (D. R.) 190.
——Localizing faults in. By Betts, (D. R.) 389, 580. Raymond-Barker, (D.) 60. Murphy, (D.) 737.
——Making, (D. R.) 109.
——Manufacture in America, 1018.
——Mileage of ocean. By E. W. Stevenson, 996.
——Recorder. By Jaulin, (D.) 477.
——Speeds. Rates of. Table for conversion of. By Raymon-Baker, (D.) 999.
——And Telegraphy. President McKinley on, 472.
——Works of the Allgemeine Electricitas Gesellschaft. By E. K. Scott, 390.
Cadmium standard cell. By Kinsley, (D.) 790*.
——Reichanstalt report on, (D.) 31.
Calcutta Institution of Electrical Engineers. Local section of, 162.
Calorimetric measurements of electric oscillations. By Harms, (D.) 227.
Canal lift, (D. R.) 824.
——Lighting in Canada, 870.
——Towage. Miami & Erie, 568.
——Traction. By Fabre, (D.) 302.
Cancer. Electricity and, 897.
Capacities. Measurement of small capacities by Geissler tubes. By Borgmann, (D.) 515*.
Capillary phenomena, Electro-. By Palmaer, (D.) 393.
Car heater. Westinghouse electric brake and, (D.) 144.
——Lighting devices. Moskowitz patent, 510. Prasch, (D. R.) 512.
——Trolley. Sleeping, 224.
——Wheels, (D.) 187.
Calcium carbide and acetylene. Data on use of, 817.
——Frolich patent, 782.
——Furnace with series arcs. Koller patent, 27.
——Manufacture. By Pradon, (D.) 690.
Carbide. Barium. Limb patent, 261.
——Magnesium. Blackmore patent, 382.
Carbon. Anodes for electrolysis of chlorides of alkalies. By Sproesser, (D.) 949.
——Bisulphide in the electric furnace. Taylor patent, 1028*.
——Electrodes. Best structure of. By Haerden, (D.) 304.
——Manufacture of. By Strauss, (D.) 1077.
——Visible radiation from. By E. L. Nichols, (D. R.) 388.
Carborundum Co. Pan-American exhibit, 605.
Carpenter Enclosed Resistance Co. Enclosed resistances, 197.
Catalysis. By Ostwald. (D.) 999.
Cathode. Iron, solution of nitrate of ammonium. By Kaufmann, (D.) 229.
——Plates. Electro-deposited. Elliott and Kishner patent, 556.
Cathode rays. By Seitz, (D.) 825. Von Geitler, (D.) 303.
——Space. Dark. By Wehnelt, (D.) 30.
Census. Electrical tabulation in the twelfth, 1065*.
Central Stations:
——Accounting, 726*.
——Communication in, (D. R.) 388.
——Distribution. A. I. E. E. discussion, 890.
——In cities, 919.
——Electricity supply. Monopoly for London, (D. R.) 1034.
——German practice. By E. K. Scott, 323*.
——High voltage vs. direct distribution, 806.
——Incomes and outputs per ton of. A. D. Adams, 814.
——Influence of the load factor on design and operation of, 97.
——Lighting and traction stations. Cost in combined. By Tittensor, (D. R.) 109.
——Load factors. By Booth, (D. R.) 788.
——110 vs. 220-volt. By Mueller, (D.) 303. Wikander, (D. R.) 475.
——Pilot wires. By Picou, (D.) 689.
——Refuse destructors in combination with. By Highfield, (D.) 108.
——Small, (D.) 28.
——Statistics. Australian, (D.) 340.
——German, (D.) 558.
——Steam engineering in. By Dawson, (D. R.) 1034.
——Storage batteries in. By R. F. Shuchardt, 254*, 306*.
——Tariff systems. By A. Wright, 60* Chamess, (D.) 71, 125. Kallman, (D.) 601. De Fodor, (D.) 788, 1051.
——And telephone plants. Depreciation of, 137.
Central Station: Alstrætten, Switzerland. By Bignami, (D.) 514.
——Bangor, Me. By Alton D. Adams, 291.
——Battersea, Eng., (D. R.) 689.
——Berlin, 1071.
——Birmingham, Ala. By Williams, (D.) 514.
——Boston consolidation, 309.
——Carlsruhe, Germany. By Winawer, (D. R.) 824.
——Cedarburg, Wis., (D.) 602.
——Croydon, England, 788.
——Dresden. By Meng, (D.) 109.
——East Ham, England, (D.) 514.
——Essen, Germany, (D. R.) 789.
——Hackney, Eng., (D.) 947.
——Helena, Mont., 755.
——Heywood, Eng., (D. R.) 948.
——Holyoke and West Kirby, Eng., (D.) 388.
——Keighley, Eng., (D.) 860.
——Kensington and Notting Hill, Eng., (D.) 514, 631*.
——Lausanne, Switzerland. By Tacuber, (D. R.) 789.
——Luton, Eng., (D. R.) 437.
——Niederbronn-Reichohofen. By Winawer, (D. R.) 900.
——Ottawa, Can., 392.
——Ottumwa, Ia., 225.
——Philadelphia consolidation, 518.
——Port Jervis, N. Y., 908.
——Seattle, Wash., 991.
——St. Anne, England, (D. R.) 825.
——Staten Island. By Ch. Loewenthal, 1053*.
——Toledo, O., municipal. History of, 430.
——Trafford Park, England, (D. R.) 900.
——Tyneside, England, power, 263.
——Walthamstard, (D. R.) 689.
——Wappinger Falls, N. Y. By Obert, (D.) 1034.
——Warren, O., (D. R.) 475.
Central Union Telephone Company, 39, 354, 355.
——Statement of, 354.
Charges, electric. Dissipation of. By Elster and Geitel, (D.) 146.
Charleston Exposition. Electricity at the. By C. T. Malcolmson, 977*.
Chesney, Cummings C. Biographical sketch and portrait, 880.
Chili. Water power development in, 484.
Chimneys for power stations. By Ennis, (D. R.) 1033.
Chlorides. Ferric. Susceptibility of. By Mosler, (D.) 901.
——Fused alkali. Electrolysis of. By Fischer, (D.) 789.
Chlorine, (D. R.) 861.
——Acker process for production. By J. B. C. Kershaw, (D. R.) 826.
——Diaphragm cells for the production of. By J. B. C. Kershaw, (D.) 949.
——Electrolytic production of. By Cohn and Geisenberger, (D.) 602.
——Girouard cell for production of, 344.
——Mercury cathode cell for electrolytic production of, 297*.
Chromium. Electrolytic production of metallic. By Neumann, (D.) 190.
Cincinnati Milling Machine Co. Pan-American exhibit, 606.
——Vertical spindle milling head, 956*.
Circuits. Calculating polyphase, (D. R.) 900.
Clark Automatic Telephone Company. Pan-American exhibit, 402.
Clift, A. S. Biographical sketch, with portrait, 366.
Climate and power transmission. By McAdie, (D. R.) 735.
Cling Surface Mfg. Co. Cling Surface at the Pan-American, 115.
Clutch vs. rheostat in electric traction, 528.
Coal handling. Boston Elevated. The, 396*.
——handling machinery for small plant, 907*.
——handling at Tacony, Pa., 399*.
——Mine. Electric power in. By Habermann, (D. R.) 688, (D. R.) 824.
——Pulverized culm. By Douglass, (D. R.) 513.
Cobalt and nickel, separating. By Balachowsky, (D.) 654.
Coherers. By Eccles, (D.) 437.

Coherer. Anti. By Neugschwender, (D.) 145.
——Development, construction, operation and function of. By A. F. Collins, 251*.
——Filings. By Eccles, (D.) 476.
Collector rings. Properties of. By Latour, (D.) 996. Heyland, (D.) 1032. St. Martin, 1073.
Commutation. Limits of. By Hobart, (D.) 600.
Colliery installation. British three-phase, (D. R.) 734.
——Theory of. By Pichelmayer, (D.) 1074.
Commutator. New type, 102*.
Condensers. Motor, 384, 829*, 1080*.
Condict, G. Herbert. Biographical sketch and portrait, 976.
Conductivity bridge. Direct reading. By Appleyard, (D.) 389*.
——Effects of magnetization on. By Barlow, (D.) 602.
——of metallic particles under cyclic electromotive variation. Change of. By Bose, (D.) 736.
Conductors. Flexible steel-armored, 396*.
——Most economical cross-section of. By Rossander and Forsberg, (D. R.) 1076.
Conduit. "Flexduct" flexible, 793.
——Steel snap cover, 695*.
——system. Data on New York Underground, 26.
Connecticut corporations, 235.
Connecticut Telephone & Electric Co. Telephone apparatus, 955*.
Consolidated Telephone & Telegraph Company. Incorporation of, 4.
Constant current from constant potential. Berg patent, 186.
Controller, railway. Care of. By Berry, (D. R.) 1034.
——Knight patent, 67.
——Recording device. Railway. Kitsee patent, 510.
——Reynolds current, 196.
——Three-phase. By Ephraim, (D. R.) 72.
——Three Rivers elevator, 233*.
Convection. Magnetic effects of electric. By Wilson, (D.) 145. Cremien, (D.) 388, (D.) 653.
CONVERTERS, ROTARY:
——Synchronous. By De Marchena, (D. R.) 651. By Thornton, (D.) 734, (D. R.) 947, (D.) 1074.
——Heating of armature. By B. A. Behrend, 346.
——Hutin & Leblanc patent, 473.
——Leblanc. By Feldmann, (D.) 787.
——vs. motor generators, 454, 460*, (D.) 947, 1062.
——Phase swinging. By Thornton, (D.) 687.
——Six-phase. Rice patent, 225.
——S. K. C., 863*.
——Storage battery with sixty-cycle railway. By Reynolds, (D. R.) 861.
——Without field windings. Lamme patent, 511.
Copper. Aluminum as a substitute for, 757, (D.) 862.
——Deposition from various electrolytes. By Beadle, (D.) 266. Sayer and Spiers, (D.) 229. Froment, (D. R.) 229.
——Electro-chemical equivalent of. By Richards, Collins and Heimrod, (D.) 229.
——Electro-metallurgy of. By Codara, (D. R.) 111.
——Grading, 833.
——market, 491, 519. 571, 1003. 1041. 1068.
——Ore refining. Hoefner. Electrolytic process, 69.
——Ores. Electrolytic treatment of. Kessler patent, 27.
——Production. World's, 237.
——In pyrites. Estimation of. By Heidenreich, (D. R.) 477.
——Refining. Elliot and Kishner patent, 647. McCoy patent, 647.
——refining plant. Electric connections for. Walker patent, 990*.
——Rotating cathode for electro-deposition of. Cowper-Coles patent, 300.
——In 1900. Statistics of, (D.) 31.
——Rumor. Westinghouse, 755.
Corpuscles and cosmic phenomena, 246.
——and popular science, 210. By L. K. Noll, 262.
Cosmic phenomena. Corpuscles and, 246.
Couch & Seeley Co. Hand microphone, 395.
Coulomb indicator. Doane patent, 299.
Coupling for dynamo, (D. R.) 899.
Cranes. Electric. By Wellner, (D. R.) 348. Rung, (D.) 512.
——Brake magnets for. By Ehnert, (D. R.) 1075.
——Equipment of. By Rung, (D. R.) 735, (D. R.) 1033.
——Traveling. By Hahn, (D. R.) 651, (D. R.) 1033.
Crocker-Wheeler Electric Co. Engine-type generator, 951*.
Crystals. Magnetic induction in. By Wallcrant, (D.) 901.
Crystal Palace Exhibition. London, 630.
Cutler-Hammer Mfg. Co. Pan-American exhibit, 308.
——Self-starter for large motors, 268.
Cyanide solutions. E. M. F. of metals in. By Christy, (D. R.) 30.
——Solution. Treatment of exhausted. Orr patent, 1072.

D

D. & W. Fuse Co. D. & W. fuses at Buffalo, 569*.
Daft, Leo. Biographical sketch, with portrait, (D. R.) 115.
Dainz Electrical Company, G. A. R. Display in Cleveland, 478.
Damper. (See also alternator, alternating current.)
——Anti-hunting. Lunt patent, 897.
De Laval Steam Turbine Co. Turbine, 693*.
Demagnetizer, Watch, 694*.
Depolarizer. Acetylene as anodic. By Coehn, (D.) 147.
Destructors. Refuse, in combination with electric power stations. By Highfield, (D.) 108, 348; (D.) 947. Goodrich, (D.) 1075.
Diaphragms. Brush discharge through. By Toepler, (D. R.) 825.
——Electrolytic cell. By Le Blanc, (D.) 189.
——Porous. Wunsche patent, 647.
Diehl Mfg. Co. Sewing machine motors, 956*.
Dielectrics. By Fleming and Ashton, (D. R.) 388. Von Hoor, (D.), 653.
——Cohesion. By Boutz, (D.) 388.
——Constant of paraffins. By Hormell, (D.) 1034.
——Constants of pure liquids. By Turner, (D.) 109. Schlundt, (D.) 901.
——Electrification of, by mechanical means. By Ashton, (D.) 72.
——Model of. By Fleming and Ashton, (D. R.) 72. Buchanan, (D.) 998.
——Resistance of. By Ashton, (D.) 72, (D.) 861.
——Specific inductive capacity of. By Ladenburg, (D. R.) 476.
——Strain. By More, (D. R.) 901.
Discharges. Electric brush through diaphragms. By Toepler, (D. R.) 825.
——Curves traced by point. By Weber, (D.) 825.
——High-altitude. By Ebert, (D.) 146.
——Induced alternating-current. By Wright and Downs, (D.) 72.
——Negative electricity. Influence of light upon, (D.) 825.
——Point. By Von Wesendonck, (D.) 109. Lamm, (D. R.) 901.
——Surfaces of large curvature. By Almy, (D.) 438.
Dissociation. Law of. By Lehfeldt, (D.) 111.
Distribution. Composite electrical. Arnold patent, 856.
——Modified three-wire system. By L. J. B. Wall, 898.
——Networks. Localizing faults and testing insulation of. By Charpentier, (D.) 950*
——Superposed current. Bedell patent, 822.
——Three-phase system and operation of single-phase circuits from. By W. L. R. Emmet, 985*.
DYNAMO. (See also Alternators, Generators):
——Comparative weights of. By Seefekiner, (D.) 28.
——Construction. By Schulz, (D. R.) 687.
——Design of 5-kw., (D. R.) 947.
——Determining hysteresis and eddy-current losses in. By Strymeersch, (D.) 1033.
——Direct-current. By Eichberg, (D. R.) 263. Mavor, (D.) 600. Hill, (D.) 651. Kennedy, (D.) 1033.
——Eddy-current, loss in. By Picon, (D.) 996.
——Efficiency of, maximum. By Finzi, (D.) 386.
——Fields. Combination. By A. Grieve, 27. G. T. Hanchett, 107.
——Series field shunt. Hobart patent, 67.
——In parallel. Engines for, (D.) 263.
——Shunt wound. Theory of. By Bernard, (D. R.) 860.
——Troubles. Brush arc-light. By Hanlon, (D. R.) 1074.
Dynamos. Windings of direct-current. By Fischer-Hinnen, (D.) 187. Rothert, (D.) 187.
Dynamo and motor. Aaron multipolar, 752*.
——Extensions of Swinburne's method of testing. By Brunhes, (D. R.) 1033.
——Mayer, 748*.
——Reliance, 907*.
Dynamometer. Electric transmission. By Deroude, (D. R.) 190.
Dreses, Mueller & Co. Motor-driven radial drill, 752*.
Drill, electric. Lincoln, 268*.
——Mershon patent, 345*.
——Motor-driven radial, 752*.
——Percussion rock. (D. R.) 436.
——Portable, (D.) 788.
——Rock. By G. H. Waltman, 267*.
Doors. Plating wood. Warren patent, 106.
D'Olier Engrg. Co. Pan-American exhibit, 795.
Dunn, Gano S. Biographical sketch, with portrait, 416.
